Let Good Digestion Wait on Appetite, and The Royal Cafe Satisfy Both.

ION CREAM Always on Hand—Phone in your orders and have them delivered.

FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

FARMERS, GET YOUR SUPPLY OF MONO CALCIUM PHOSPHATE ANIMAL BUILDER

from J. H. McLAUGHLIN, SPRUCE GROVE.

Stock always on hand. For all classes of live stock. On basis of strength this is cheapest mineral supplement you can buy.

YOUR HOME IS YOUR CASTLE

Admit only clean, constructive men by reading THE CHRISTIAN SCIENCE MONITOR. A Daily Newspaper for the Home. It gives all the constructive world news but does not exploit crime and scandal. Has inspiring feature pages for all the family on Women's Activities, Home-making, Gardens, Education and Books. Also pages for the Children and Young People. Viewers of affairs, as interpreted of news in the "Masters of the Nations" Column and "Working the World to Day" are of special interest to men.

GOOD USED CARS

SOLD WITH A GUARANTEE.

We have the Car for you—a Car your size, and at your price. Here are real values offered in these automobiles of various makes:

1929 CHEVROLET TRUCK	\$300
1927 Falcon-Knight Sedan, in good running order,	\$110
1931 Special Chevrolet Roadster, in good condition,	\$350
1929 Essex Coupe, in excellent shape,	\$275
1932 Willys Sedan, in excellent shape,	\$400
All Cars Reconditioned and in Good Shape!	

Sommerfield & Mayer,

Agents for CHEVROLET and OLDSMOBILE CARS. Agents for BRITISH AMERICA OIL CO. and all their Products: Hard Oils, Greases, Transformers' Oils, Belt Dressing, etc., etc.

SERVICE GARAGE. Stony Plain.

DON'T BUY IN THE DARK. SPEND YOUR MONEY FOR ADVERTISED GOODS.

UFA Meeting.

Mr. R. Barnes, president of the United Farmer, Constituent Association, has called a meeting of the executive committee for tomorrow, Friday, in Stony Plain, for the purpose of transacting the regular business. The matter of setting a date for the nominating convention will come up for discussion.

The officers of the association are: President, R. Barnes, Hansen's Corners; A. Partridge, Duffield. Vice-Pres.: W. Matthews, Sec. Treas., Seba.

Tomorrow's Dance.

The S. P. H. Hockey Boys are expecting a good turnout of the friends of the team at their first dance on Feb. 1st. The boys are said to have pulled off some good hockey games this season, having played two games in Edmonton and the balance were played on the local rink; and it is on this record they are appealing for support. A first-class orchestra has been engaged, and lunch will be served. A drawing for a very valuable article will be held at the lunch intermission.

Registered Seed Growers.

Among those grain growers listed in the United Farmer as "Alberta Registered Seed Growers," with seed in sell, are the following:

Marquis—Wheat—Clarence Ashmud.
OAC21 Barley—J & W Clark Bright Bank. At Holborn—A and H Everington, C Ingelhart, H McDonald, C Woodley, K McKinnon. At Stony Plain—Troy Propp, C Shaul.

Christian Science

At all Christian Science churches next Sunday, the subject of the Lesson-Germon will be "Love." The following is one of the Scriptural quotations contained in the Lesson-Germon: "And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love dwelleth in God, and God in him" (1 John 4:16). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 6): "'God is Love.' More than this we cannot look farther we cannot go."

Spruce Grove M.D. Ratepayers to Meet.

Spruce Grove Municipal ratepayers held their annual meeting for 1935 on Wed. Feb. 20, at the Municipal Hall, at the Grove. Thru a resignation of several of the Division, a new member has been added to the Council, bringing its membership up to seven. The new member will represent the sub-division to the west of the City of Edmonton, taking part of his territory from that of Councillor Johnson's Division.

Altho re-elected last year, Councillor Johnson will appeal to the electors again this year, at the coming municipal election.

The other members of the Council whose terms expire now are—Councillors G Bobuta, Hagen and Jeaperson.

HARDWICK'S THE HOUSE OF QUALITY.

Women's O.S. Rayon Bloomers.

Slight imperfection makes these sub-standard. Colors, peach, white, pink, Nile. Per pr. 39c

Wabasso Figured Broadcloth.

Fresh, colorful designs in this season's latest shades; guaranteed sun and tub fast. 2 yards for 45c.

Men's Doeskin Flannel Shirts.

Made in a heavy windbreaker flannel, triple stitched; coat style, button thru; colors, red green and tan. Each \$1.45.

Men's Socks.

Men's Allwool Work Sox; a soft, close knit, medium weight Sock. Two pairs for 45c.

Men's Pure Wool Dress Sox; fancy pattern: real wearing quality. Per pair 29c.

Cotton Jersey Gloves.

Men's Cotton Jersey Gloves; grey; per pr. 25c. Brown, per pair 15c.

Women's or Cadet sizes; per pair 15c.

Get It at HARDWICK'S.

AGENTS ALBERTA DAIRY POOL.

We have one of the latest Van-Norman Boring Bars. Let us give you a price on reboring your car and putting it in Al shape for the coming season.

Some good, cheap Used Cars on hand.

BARTH & ANDERSON'S

Phone 6. Stony Plain.

THE SANITARY MEAT MARKET.

Beef, Pork, Veal and Lamb. Fish & Poultry of all kinds. Corned Beef, Pickled Pork, Pickled Tongue, all kinds.

How To Keep Colds

UNDER BETTER CONTROL

When Colds
THREATEN

VICKS VA-TRO-NOL
At the first signs of nasal irritation, quick relief drops of Vicks Va-tro-nol. Its timely use helps to prevent many colds, and to throw off colds in their early stages.

If a Cold
STRIKES

VICKS VAPORUB
At bedtime, massage throat and chest with Vicks Vaporub. Rub the mother's stand-by in your nostrils. All night long, by stimulation and inhalation, Vaporub brings direct relief.

To Build Resistance to Colds: Follow the rules of health that are part of the clinically tested Vicks Plan for Better Control of Colds. (The Plan is fully explained in each Vicks package.)

VICKS PLAN FOR BETTER CONTROL OF COLDS

Appraisals Of Progress

"If we are to take stock of the world's advance in 1934, let us first take stock of ourselves."

With this challenge to the conventional New Year appraisals of progress, Dr. Robert A. Millikan, distinguished scientist and Nobel Prize winner, contributes to the January American Magazine what is described in an editorial review in "The Reader's Digest" as one of the truly stimulating articles of the month.

It is stimulating, and for that reason we utilize this column to reproduce "The Reader's Digest" editorial review of Dr. Millikan's article. It says:

Dropping for the moment his famous pursuit of the cosmic ray, Dr. Millikan seeks for rays of hope in the cosmos of human aspirations. The usual end-of-the-year statistics on our loadings, steel output and building construction, he says, only blind us to the real fundamentals of mankind's advance. Records of transportation are important, but not so important as whether the man who last year used our patented methods of eating space were more thoughtful and kindly than those who were transported the year before. We may boast how speedily we get about and forget how to walk peacefully and reflectively with ourselves.

The number of miles traveled in automobiles is not as significant as what we saw and felt on our way. Did we hog the road and give battle at crossings, or were we chivalrous as knights? How many boons did we grant with our cars to the old, the lame, the shut-in? And "how many times did we drive alone to a hilltop to read and to meditate, hungering for betterment?" Just as human values transcend statistics, so we must use the golden rule to measure true progress.

Our improved communication, whether by radio, telephone, or transatlantic cable, does not of itself denote a higher civilization. The main question is: What was communicated? Fear and prejudice? Did our remarkable facilities tend to promote hate and greed, bad ideas and false sentiments? Or did they reflect sounder thinking, more generous and humane impulses?

What if we did make a staggering number of telephone calls or talk freely to London and Paris? That is of small moment compared with whether or not we used the telephone as an instrument of fellowship. Did we call and offer to help a friend, muffled by ill luck? Were we less rude and intolerant? There was no progress if we growled into the mouthpiece and failed to employ the phone for more intelligent, gracious conversation.

The fact that some of our tall buildings are gloomy and half occupied becomes really tragic only as the minds of those who use them become gloomy and half occupied, too. Not the number of new buildings that go up but what goes on in them is the vital standard. Do new buildings count up better working conditions and larger opportunity?

Let us not be deceived by the production of our farms and factories. The supreme question is, did we grow in mental, moral and physical stature? Not how fast the wheels turned in 1934, but "how slow and firm were the feet of thoughtful men upon the earth." Not how much improvement in motor design, but "how much we improved the motor of men—the knowledge, the understanding, the purpose."

Stratosphere flights were made in 1934, but what of the aspirations of those who remained below? "In 1935, perhaps," Dr. Millikan writes, "if we are thoughtful and kind and courageous, we may ascend a little way toward our own stratosphere—the mysterious attitudes of ourselves."

Fined For Excess Noise

Austria Places Limit On Sounds

Vienna, Austria, is determined to have silence, and has placed a limit on rattles and other sounds made by vehicles. A unit of sound, labeled "phone," has been evolved. Each class of transportation is allowed just so many "phones," no more, and there is a schedule of fines according to the number of excess "phones." The police use a new apparatus which records the sound emanations of passing vehicles.

Kidney Troubles

These poisons accumulate in the system and bring on pain, backache, headache, rheumatism, or flatulence. Take Kid Pills to restore the kidneys to a healthy condition and eliminate the poisons from your system.

W. N. U. 2083

YOUR HANDWRITING REVEALS

YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

Editor's Note: More and more readers are taking advantage of the author's offer to make a personal reading. This is only natural when so many people "milk" the art of making the most of themselves. See the offer following this week's article.

I know that it is one of the most difficult things in the world to try and extend advice to young people who are in love. And if the advice is negative—that is, opposed to their feelings at the moment—so much the worse.

So that the case I am going to quote in this article is particularly timely.

Some six months ago, a young lady living in Ontario, sent me a rather long specimen of the writing of the man she was very friendly with—a man, moreover, who had asked her to marry him.

She was fond of him in many ways, and really seriously considering accepting his proposal. But there were certain disquieting points in connection with him that didn't quite please her. She couldn't for instance, get very much information from him as to his past. He was somewhat vague, and to all her natural enquiring as to his family, and so on, he was non-committal.

All this gave her cause to pause, and she decided to have advice as to his suitability and stated definitely that she would act entirely on my advice. Her friend, by the way, was a man about 36, and her own age was 23.

This was a very serious situation, indeed, for my correspondent showed in her own handwriting that she had a very cultured mind and a generous, rather idealistic nature.

However, her friend's writing was very obvious. There were definite indications, not only of deceitfulness, but of outright dishonesty. He was a man who could be very charming, but there was a distinct sneaky streak in him.

I advised my correspondent to give him up. It was a hard thing to ask, but my honest opinion was that he was only her type, but that her future with him would be very unhappy.

I heard nothing more from my correspondent for a while, but just recently I received word from her and she told me that on receiving my letter, and recalling her own doubts about her friend, she had given him up. She had since then married, and his wife was living in the United States. He had not been divorced.

I need hardly state that she was grateful for the advice that had enabled her to avoid an embarrassing situation, if not worse.

The best thing to do with advice when it is given by an unbiased person is to take it. It is the simplest matter in the world to check any statements made with your own knowledge of your friend. And it gives you definite points to watch out for.

It is up to you whether you will attempt to effect a change in the habits or characteristics of your friend, or whether the traits revealed are such that you should sever the association altogether.

And in this connection, it is worthy of note that young people in love are more amenable to suggestions as to their behavior, or characteristics, than later on when they are married.

Can Mr. Hibbert help you? Have you any problems that his advice would help you to solve? Do you want to know the truth about your friends? Send specimens of the writing you wish to be analysed, stating birthdate in each case. Send 10c for each specimen, and enclose with 3c stamped addressed envelope to: Lawrence Hibbert, care of Winnipeg Newspaper, 175 McDermott Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable, however, owing to the large number of letters that are coming in.

One sure way to catch a cold is to leave home on a frosty morning with no handkerchief in your pocket.

It is not how many years we live, but what we do with them.

BEFORE BABY CAME

Mr. George Edmonds of 121 Glenview Rd. writes: "I was stock 'out' in 1921. 'My stomach was just gone' before the birth of my first child. I could sleep, did not care to eat food, and was unable to get up. I took two bottles of Dr. Williams' Pink Pills. Prescription strengthened and I was able to get up. I continued in the best of health."

All At One Time. New Tablets 50 cts. Liquid \$1.00. Large size, 100 cts. or liquid, \$1.25.

Little Journeys In Science

MAGNETISM

(By Gordon H. Guest, M.A.)

In various countries there is found an ore of iron which has the power of attracting small bits of iron. Pieces of this ore are known as natural magnets. The name for this particular kind of iron ore was decided upon because large quantities were found near a town in Asia Minor called Magnesia. The natural magnets not only attract small pieces of iron and steel but they also possess the power of indicating direction.

If a piece of steel is stroked by a natural magnet it becomes itself a magnet. There are, of course, other and more convenient ways of magnetizing a piece of steel. Permanent steel magnets include the bar magnet, the horseshoe magnet and the compass needle.

If iron filings are scattered over a piece of paper which is a bar magnet it will be found that the iron filings arrange themselves in curved lines about the shape of the magnet. It is found that these lines curve into the ends or near the ends of the magnet. If the bar is suspended by an untwisted string it will come to rest with one end pointing a general north direction. This end is known as the north-seeking or north pole.

The space surrounding a magnet in any part of which the force from the magnet can be detected is called its magnetic field. It can be shown that the magnetic force is greatest in the neighborhood of the poles. The lines of force belonging to a magnet are considered to commence at the north pole, pass through the air surrounding space, enter at the south pole and continue through the magnet from the south to the north pole. Thus every line of force is a closed curve.

The fact that a compass needle points approximately north and south (23½ degrees east of north) indicates that the earth is surrounded by a huge magnetic field having a south pole near the geographical north pole and a north pole near the south geographical pole. Because it has been agreed upon by scientists that the pole which points to the north should be called the north-seeking pole.

If Both Are Young

Chances Of Survival Until Golden Wedding One To Six

The chances a newly married couple have of surviving to celebrate their golden wedding anniversary have been raised from the realm of the impossible and put into an absolute category by statisticians of the Metropolitan Life Insurance Company, according to a company bulletin.

When the bride is 22 and the bridegroom 20 years old, which is about the average example, it was found that they have approximately one chance in six of living out their fifty years together.

"The chance of this same couple surviving to their silver wedding is, of course, very much greater," the statisticians say. "In fact, just about three in four; and their chance of reaching their tenth anniversary is not far from certainty, namely, 92 per cent, or considerably in excess of nine in ten."

Many New York couples were moved to make their calculations by the growing number of marriages accompanying the approach to better business

WORLD HAPPENINGS BRIEFLY TOLD

Major W. C. Littleton, of Calgary, has been named president of the Alberta Military Institute. Col. D. W. B. Spry, commanding military district 13, has been appointed honorary president.

The Montreal Star has celebrated its 60th birthday, still under the ownership and management of the Lord Atholstan who founded it as a daily newspaper two years after Confederation.

The conference of the Associated Australian Chambers of Commerce resolved to press for an early empire conference to arrange for a new inter-empire trade agreement to operate when the Ottawa pact expires.

A resolution asking the Dominion government to appoint a trade commissioner to Jerusalem, was passed at the final session of the 24th convention of the Canadian Federation of Zionist Societies held in Toronto.

A survey of Canadian natural resources so they may be viewed in relation to the requirements of the Dominion and world demand, is urged in the 18th annual report of the national research council tabled in the House of Commons.

The government has passed an order-in-council which abolishes all positions in the government service vacant on February 1. The action is merely a "cleanup" of surplus posts, while the service if any of the posts abolished are needed they will probably be re-created.

WHAT TO DO ABOUT "Acid Indigestion"

A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who think they have "weak stomachs" or "indigestion," doctors say, suffer in reality from nothing more serious than acid stomach. And this common ailment can usually be relieved now, in minutes. All you need is take a few Phillips' Milk of Magnesia after meals. This acts so almost immediately neutralizes the acid, and brings on your trouble. You feel like a new person.

Try this just once. Take either the familiar liquid "PHILLIPS'" or the new "PHILLIPS' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

PHILLIPS' Milk of Magnesia Tablets are now sold in all the stores everywhere. Each box contains 12 tablets, the equivalent of 12 capsules. Each box contains 12 capsules, the equivalent of 12 capsules. Each box contains 12 capsules, the equivalent of 12 capsules.

PHILLIPS' Milk of Magnesia

More Intensive Application In Future Than In Past Of Science To Production Of Canada's Needs

An even more intensive application in the future than in the past of science to the production of the world's needs is predicted in the 17th annual report of the National Research Council, tabled in parliament.

The application will be directed "not only to the better understanding of the materials entering into industry and their possible improvement, but also to the training of men who will be in technical control. Standardization will also play a most important part."

Four major projects are suggested. The first is a survey of Canadian natural resources.

The other projects are: Research on home and building construction and equipment including standardization of materials, suitability of materials for special purposes, ventilation, heating, lighting, insulation (both heat and sound) and other factors affecting health and happiness; research in connection with the re-adjustment of Canadian agriculture and the utilization of agricultural wastes; development of standard of quality, quantity, and performance, of commodities and services generally.

Eighty-seven researchers, according to the report, were in progress in the council's laboratories in Ottawa during the year under review and others were proceeding under the auspices of the council's 27 associate committees or its assisted research program.

Revenue of the council from other than the parliament grant was \$65,114.23 as compared with \$44,518 the year previous. The total revenue, however, was approximately \$9,000 less than the year previously and \$18,000 less than the year before that.

At the end of the year under review the professional staff of the council totalled 68, of whom 30 held doctorate degrees in science.

Prison Reform

General System For Boys May Be Adopted In Canada

Adoption in Canada of what is known in England as the "Borstal system" for the special care of boys sentenced to the penitentiaries is being considered by the Dominion government. The speech from the throne made the announcement.

Boys under 21 years old when sentenced for three or more years instead of going to the penitentiaries, would go to a separate institution. This would apply to all boys except those considered incorrigible. They would therefore have no contact with older prisoners. A complaint of the present system in Canada has been that boys were often thrown into the company of hardened criminals.

At a Borstal institution in England, while the discipline is strict, the boys for the most part do outdoor work. They are employed on building construction, stone-mason and bricklaying work and various other forms of employment.

Diplomatic Sales Talk

Endorsements Of Puzzle Seller Amusing Even If Flippant

A Pitchman stood before Minkey's burlesque theatre in New York for after-supper and offered very persuasive for sale. Also an amusing, if flippant, set of endorsements. "I'll tell you, folks, do you wanna know what he do after those big dinners down at the White House? Do you wanna know what they do after when all them notables, some of 'em foreigners and can't talk English, want to sit around in a cozy way? I'll tell you, folks: they bring out sets of Original Arabian Ring Puzzles, and sometimes they work 'em all evening. The very same puzzles, folks, that I am now offering you for 9 cents each, or three for a dime."

Our best telescopes are not able to reveal possible buildings on Mars, even though the buildings be a hundred times the size of any on earth.

Dogs Travel In Luxury

Team Taken To Camp In North By Airplane

It's getting to be pretty soft for the dogs. Stores have been selling all manner of fluffy canine things: snooty, wicker beds, hand embroidered blankets, elaborate feeding dishes and now comes the story of a dog-team that has gone luxurious.

A couple of fishermen at Kenora were going up to the winter camp on Sydney Lake, 50 miles by air, 90 to 100 miles by trail through the bush, along lakes and rivers and over high rocky ridges.

Rather than spend the time, four or five days on the trail, the fishermen went down to the Canadian Airways' base at Kenora and after dickering with Manager Stan Wagner, loaded the 11 dogs, themselves and their outfit in Pilot Macgregor's plane and arrived at their destination in a little better than half an hour!

Dogs are not one of the freight items that have been travelling by air from railways to the mining camp. During the Christmas season commercial aircraft did a booming business.

Canadian Airways pilots from Sioux Lookout moved nearly 12,000 pounds of freight, including more than a quarter of a ton of mail and carried 41 passengers in two days.

The number of unmarried women between 30 and 50 years of age is stated to be the highest ever reached, due in great part to the losses of manpower in the World War.

Value Of The Free Use Of Sea Foods Should Be More Widely Known In Interests Of Health

Maritime Spirit

Report States Trouble Still Exists Among Penitentiary Inmates

The Toronto Mail and Empire, in an article from its Ottawa correspondent, says:

"Disquieting evidence of the continuance of a mutinous spirit among the inmates of Kingston penitentiary during the past year was presented in the House of Commons in a report from D. M. Ormond, superintendent of penitentiaries, which Hon. Hugh Guthrie, minister of justice, tabled."

"The tenor of the document was that the mutinous spirit the convicts had manifested during the autumn riots of 1932 had by no means been quelled, but had continued in evidence during the past 12 months. Not only had discipline during the past year been generally unsatisfactory, but 20 per cent. of the inmates had remained actively mutinous and insubordinate," The Mail and Empire said.

"Bos, will you give me a dime for a sandwich?"
Gent—"Let's see the sandwich."

Losses estimated at \$100,000,000 were caused by fires on U.S. farms last year.

Generous use of sea foods means fewer drug and doctor bills, for sea foods supply the human body not only with nourishment but with elements which prevent what are known as "deficiency" diseases.

The story starts with ocean water.

Scientists have found that every gallon of normal-ocean water contains something over four and a half ounces of ordinary salt and half an ounce of other dissolved solids. Salt is important of course but for present purposes it may be forgotten and attention turned only to that last half ounce of other dissolved solids, for it is that tiny quantity which contains those traces of iodine, iron, copper, manganese, and one or two other elements which are essential to human health.

Take iodine as a typical example of these necessary elements. "This element," it is pointed out by Dr. W. A. Clemens, Director of the Pacific Biological Station conducted at Nanaimo, B.C., under authority of the Dominion Minister of Fisheries, "occurs in the human body to the extent of less than three-tenths of an ounce and the daily requirement for bodily health is only one-millionth of an ounce, yet even this minute amount is not supplied by the drinking water and products of the soil in certain inland regions, with the result that man and beast are afflicted with goitre. One cubic mile of ordinary sea water contains from 100 to 1,200 tons of iodine, sufficient for the iodine needs of a nation, but we are dependent upon the plants and animals of the sea for the concentration of this element into utilizable form. A pound of fish can supply as much as ten times the daily iodine requirement, which amount appears to be largely concentrated in the skin of the fish."

"The sea contains a like proportion of other essential elements without which man is prone to develop certain 'deficiency' diseases. The lack of these elements may be remedied by a generous use of sea foods. Certain marine forms seem capable of selecting one particular beneficial element and storing it in their tissues, and thus making it available for man. Examples are found in the high content of copper and manganese in shellfishes, of fluorine in haddock and cod."

How does it happen that the sea is such a storehouse of the materials which the body must have and can obtain by using the fish and shellfish which have lived upon the food which is present in the ocean? It is conceivable, says Dr. Clemens in this connection, that in the remote past the sea was practically free surface, but through unknown ages its surface has been subject to evaporation and the pure water thus removed has fallen as rain upon the land, leaving out the more soluble materials as it has filtered its way through the soil and finding its way back to the ocean "as an almost infinitely dilute solution of salts." Further evaporation again removed only pure water, leaving the salts behind, until, in the process of time, every gallon of the sea water came to contain its five ounces or so of dissolved solids, including the iron and iodine and other substances which humans must have. If they are to be strong and healthy, "The minerals of the sea, already being in solution, are always available for the marine plant forms on which the sea's inhabitants are dependent for food. The vegetable life of the ocean uses the dissolved minerals for their growth, the fish use the plant forms, and man, by using sea foods, may thus obtain the health-giving elements which Nature's alchemy has stored in the sea in such richness."

Mike—What's the idea of wearing a mourning band on your left leg, Pat?

Pat—Me mother has passed away. Mike—But why on your leg instead of your arm?

Pat—Well, she was my step-mother.

The SNAPSHOT GUILD

Don't Let Winter Stop You

Watch your exposure and you will get pleasing pictures. The snapshot at the left, taken with a folding camera at f/8 and 1/25th of a second, is properly exposed. The one on the right simulates the effect of under-exposure from two small stop opening or too fast a shutter speed.

A letter received the other day opened my eyes and made me realize that sometimes we take too much for granted. A reader of this column wrote in saying she enjoyed the Snapshots immensely and would be so happy when winter was over and spring arrived so that she could take some good pictures again.

Here I have been taking it for granted that everybody knew that with present day film it is possible to take good pictures the year round—winter included. Well! If Mrs. ——— thought she would have to wait till spring to take pictures she would be hundreds more of the same belief.

Believe it or not, picture taking in the winter is just as easy as in summer, opportunities are numerous and scenes just as beautiful.

There is one important thing, however, to keep in mind when taking pictures in the winter—Watch Your Exposure! Many seem to think that because snow is white, exposures should be much shorter than in summer. This would be true if there were nothing but snow in the picture and if the light were as strong in the winter as in the summer. Neither condition exists, however. Trees, houses, buildings, animals, etc., retain their usual color in the winter. The old rule—exposure for the shadows and let the highlights take care of themselves—is still worth following. Although objects are brightened somewhat by greater reflection from the snow, this is frequently fully offset by the lesser intensity of the sun in the winter.

Where snow is not nudged by wind it remains a glorious mantle of white, clothing familiar scenes in new guises and lending a peculiar charm to trivial objects that fall to attract attention at other seasons. With photography as the medium

of expression, winter scenes are more truthfully rendered in black and white than summer scenes. Color is absent for the most part in the former and the monochrome print conforms very closely to the predominating whites, grays and blacks of Mother Nature's winter day.

Here is a suggestion that will help you get better results, that is, if you follow it. When taking a picture make a note of the "stop" you used that is—the first or second or third opening, if you have a box camera, or, if you have a folding camera note opening at f/11 and so on, or just a 16; and with a folding camera also make note of the speed of the shutter, that is, 1/25th of a second, 1/50th or whatever it may have been. When prints are returned you can say to yourself—"This one's awfully light and does not show up as I expected. Let me now—I took this picture at noon at 1/50th of a second and had the diaphragm set at f/11. A little too fast to get the proper exposure under the heavy winter sky on that day. The next time under the same conditions, I'll either set the diaphragm pointer at f/8 to let in more light or else leave the diaphragm opening at f/11 and let the shutter speed at 1/25th of a second so as to give the picture a 'good exposure'."

It might be a good idea to cut out the pictures printed above and keep them for future reference. They will help you in judging your own pictures if you are not quite sure just what is wrong with your prints. So—don't let winter stop you. There are countless pictures to be taken and by giving a little thought to light conditions plus a little experience you'll get good pictures. Go ahead and take them!

JOHN VAN DUILDER

Visitor: "I suppose you farmers would be glad to have this rain keep up?"
Farmer: "Well, it'll do us more good if it comes down."

RAISE DR. WERNET'S POWDER

Cripes plates so firmly and snugly they can't slip—never know you have false teeth. Dr. Wernet's Powder—never causes soreness—it is the world's largest seller—prescribed by leading dentists—costs but little but bluffs toughest in your mouth long.

SUNDAY SCHOOL LESSON

FEBRUARY 3

PETER'S RESTORATION

Golden text: Lord, thou knowest all things; thou knowest that I love thee. John 21:17.
Lesson: Mark 16:7; John 20:1-10; 21:1-23.
Devotional Reading: I. Peter 1:8-12.

Explanations and Comments

Peter's Restoration. In 21:15-17. After the disciples had broken their fast, Jesus turned to Peter and said, "Simon, son of John [notice that he does not call him Peter, Rock] lovest thou more than these [other disciples love me]?" This recalls Peter's boast in last week's lesson, "If all shall be offended in me, I will never be offended." Now he replies, "Yea, Lord, thou knowest that I love thee." Note that he is too humble now to claim priority of love, he does not say "I love thee more than these."
Then said Jesus, "Feed my lambs," thus telling the heart-broken Peter that he was trusted, that he would have a chance to redeem himself a second time Jesus asked the same question, and received the same reply. "Feed my sheep," said Jesus. Who are the lambs and who are the sheep? Do the lambs typify the children, or is Jesus' standard of maturity spiritual rather than physical? An English commentator writes: "In God's great human family there are some who are becoming more and more 'fellow-workers' with him. These correspond to the elder children moving on towards real companionship. But there are some who are spiritually undeveloped—his dearly-loved little ones who need constant guidance and watchful care. The ignorant and the unintelligent, the savage and the holligan. 'Make allowance,' he seems to say, 'for their backwardness, make provision for their need. Feed my lambs.'"

When Jesus asked his question a third time, Peter was grieved and replied, "Lord, thou knowest all things; thou knowest that I love thee." "Lord, thou knowest everything, all I said and all I did and all I am, but this thou also knowest; that the deepest thing in my heart is my love for thee. By that love which has borne no fruit, which has failed in the hour of need, which has been mastered by fear, but which is real and is my very soul, by that let me be judged." (John Watson).

On University Senate

Principal and Dean of Regina College Included in Personnel

The principal and dean of Regina College have been included in the personnel of the senate of the University of Saskatchewan by amending legislation to the University Act, introduced in the house by Hon. J. W. Estey, K.C., minister of education.

At present Dr. E. W. Stapleford is principal of the college and Professor W. Ramsay, dean.

TORONTO MAN GIVES AFFIDAVIT

In a sworn statement Mr. Henry Dawson, 30 Caroline Avenue, Toronto, tells how Fruit-a-Lives gave him lasting relief from severe headaches. He wants others to know how his own experience and consent to tell of it in a statement made under oath before a notary in order that everyone would be convinced of its truth. Mr. Dawson declares, "Following two serious operations I was bothered with very severe headaches. The pain on the top of my head and in my forehead was, at times, more than I could bear. I consulted a doctor. He advised me to take Fruit-a-Lives. Since I used them I have not had a minute's trouble with my head. I can't recommend Fruit-a-Lives too highly to anyone who is troubled as I was."

Copy of Mr. Dawson's statement will be sent on request. Write to: Fruit-a-Lives—Box 206, Everywhere.

Annual Auction Sale

Two Sets Of Second-Hand Teeth Sold For Dollar.

During the more than 300 years history of the Annapolis Valley there have been many unusual auction sales but perhaps not one has been so extraordinary as that which took place in the municipal court, town of Berwick, Nova Scotia.

The goods had been seized by plaintiff and when defendant did not pay amount due within the specified time the articles as listed below were sold:

One set of artificial teeth, second-hand (upper plate), four gold teeth, suitable for a young man.

Also part of an old upper plate of artificial teeth.

The entire lot sold for one dollar.

In Bed With Neuritis Every Winter

Until Kruschen Brought Relief

"For three years," writes a woman, "I have been sick in bed about three months every winter with neuritis in my hips and legs. Last winter I started taking Kruschen Salts, and got better from the first dose. This winter I have not been in bed at all." (Mrs. D. M.)

Neuritis is a result of impurities in the blood. And it is impure blood, circulating all over the system and setting off inflammation in the tissues, that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

FASHION FANCIES

OUTE SIMPLE-TO-SEW DRESS FOR TINY GIRLS-PLAID-TO ALLOW PLENTY OF LEG SPACE WHEN SHE FLIES ABOUT

By Ellen Worth

Lots and lots of washing frocks are the tiny tots needs—simple ones are so cute!

And isn't this the cutest style ever? The fussless falls so prettily from the shoulders. The little sleeves are so cute.

And to make it! Practically a front and back section to be joined. Cotton broadcloth with shiny finish that wears for every day and day is sketched. It may be pale blue, pink or green. The plaided flit is white lawn which gives your dainty trim.

Scotch plaided gingham is another darling scheme.

Dimity prints, pastel voile or organdy, gingham, checked lawn, etc. are suitable.

Style No. 961 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 35-inch material with 2 1/2 yards of plaiding and 1/2 yard of 1/2-inch ribbon.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

You can have a very smart wardrobe at little expense of time and effort—our attractive Book of Fashions (price 20c) is just begging with ideas that you can turn into chic wearable clothes. Send for your copy to-day.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

Royal Bank of Canada Presents Strong Statement

Morris W. Wilson, President and Managing Director, Notes Distinct Improvement in Business—Looks Forward to 1935 With Confidence.

Sydney G. Dobson, General Manager, Reviews Financial Statements—Reports \$50,000,000 Increase in Deposits

At the Sixty-Sixth Annual Meeting of The Royal Bank of Canada, held in Montreal, Morris W. Wilson, President and Managing Director, paid tribute to the distinguished service rendered to the bank by Sir Herbert Holt, who had presided at successive Annual Meetings for over a quarter of a century, and whose outstanding ability and prestige have been important factors in the sound and consistent growth of the bank during his regime.

In commenting on the strong Statement presented to the meeting, Mr. Wilson said that it reflected a year of operations under distinctly improved conditions, both at home and abroad.

Referring to the recent revision of the Bank Act and the Act incorporating the Bank of Canada, he stated that at the public hearings preceding these enactments, the bankers were able to justify their administration. In view of the curtailment of earning power resulting from restrictions upon interest rates chargeable by banks and the withdrawal of note-issuing privileges will inevitably reduce the ability of banks to maintain unproductive branches in main communities. Earning profits have never been excessive, and if an efficient banking system is to be maintained, it is a point beyond which the economy must meet falling revenues on one hand, and increased taxation on the other, cannot safely be carried.

Referring to taxation, Mr. Wilson said: "For every dollar paid in dividends last year we paid sixty-seven cents to the Canadian tax-gatherer. This does not take into account the income tax paid by our shareholders themselves on dividends received from the Bank. Surely these figures require no comment."

In discussing the improved conditions in Canada, Mr. Wilson pointed out that during the past year manufacturing and employment have approximated the levels of 1929; iron and steel production, the output of automobiles, textiles and electrical goods, and the value of exports, notably lumber and minerals, had advanced substantially. The wheat crop was no larger, but fortunately, higher prices prevailed. The value of field crops had increased by \$100,000,000 and the enhanced purchasing power of the farmers had stimulated trade throughout the country. There has been increased demand for Canadian mineral products abroad and it is anticipated that the output of Canadian gold mines will exceed \$100,000,000 as compared with \$85,000,000 in 1933. The building boom in Great Britain created unprecedented demand for Canadian lumber and a record volume of shipments has been made during the past year. He mentioned the importance of the four tons of Canada, which had amounted to over \$300,000,000 a year and for several years brought more money into Canada than our wheat exports.

Newsprint

"Demand from the United States for newspaper has been strong, with the result that the output of the Canadian mills in 1934 was more than twenty-five per cent. higher than in the previous year. In fact, it was within five per cent. of the peak year of 1929. Prices, however, were even lower than in 1933 and, despite the most rigid economies, operations have continued on an unprofitable basis."

The Railway Situation

"The railway situation continues to be the most important economic problem in Canada. Obviously, the Canadian people cannot stand indefinitely a weekly drain of over \$1,000,000 for railway deficits, and the time is rapidly approaching when more drastic and effective action will have to be taken to see that the national credit and solvency."

Referring to world affairs, the President said that in spite of the political situations during the past year, business has continued to improve. Production in Great Britain for several other countries was greater than in 1928.

"It is only in the countries of the gold bloc where business has become materially worse during the past year. World trade, however, must be released from the multitude of new restrictions which have begun to swing toward better economic relationships between countries, and I look upon this attitude as a happy augury of further favourable developments during the coming year."

The Capitalistic System

"It is not surprising that new social

experiments should have been undertaken in many countries in the hope of mitigating the suffering incidental to violent booms and depressions. Undoubtedly, the war placed a great strain upon the capitalistic system. That system has been the result of a process of evolution and as such has been subject to modifications from time to time to meet changing conditions. Further modifications and changes may be a necessity if we are to be rid of the evils of major depressions. The difficulties in the distant past were the outcome of ages. At the present moment the major difficulties have to do with the distribution of an increasing surplus which tends to exceed purchasing power. Increasing attention must be given to measures which will provide for a freer and more even flow in the exchange of goods and services. Insofar as the "New Deal" in the United States, or economic experiments in other parts of the world, may provide a workable answer to this problem, we should not hesitate to profit by that solution. Social and economic experiments which fail, however, are usually costly and it is prudent and wise to "make haste slowly" in changing fundamental principles of the existing system.

The Outlook

"For more than a year and one-half there has been a distinct upward trend in business activity; improved conditions have been general in practically all branches of agriculture, industry, mining and trade. At the beginning of the new year conditions, both at home and abroad, favor a continuation of this upward trend. It is true that in Canada there remain a number of difficult problems for which practical solutions are necessary, but I believe that the Canadian people have the courage and ability to solve such problems in a rational manner. It is upon the basis of past performance that I look forward to 1935 with renewed confidence."

GENERAL MANAGER'S ADDRESS

In his remarks, Mr. S. G. Dobson, newly appointed General Manager, referred to the very satisfactory nature of the Annual Report and Balance Sheet presented. He said in part: "After several years of declining figures due to general conditions, I am glad to say the trend has not only been arrested, but under most headings has been reversed, in some instances to a substantial degree."

In reviewing the Financial Statement, he said that perhaps the most gratifying feature of the Balance Sheet is the increase of over \$50,000,000 in total assets as reported by the public. The total is now \$612,579,453. Canadian branches contributed \$44,000,000 of this total increase, of which \$11,000,000 is in the Savings category. It is interesting to note that an increase in deposits was shown by every province in the Dominion in 1934.

"Current loans in Canada show an increase for the first time since 1929, and are up over \$10,000,000. This is significant change, reflecting, as do other items in the Balance Sheet, a heartening increase in Canadian business activity. Reflecting, as do other items in the Balance Sheet, a heartening increase in Canadian business activity, the fact that our banks in Canada, because of their easy cash position, are looking for desirable loaning business, and the comparatively small increase under this heading reflects a lack of demand for loans, rather than a restriction of credit."

"Profits for the year were \$4,368,217 but are not properly comparable with published profits for the previous year because heretofore they were reported after deducting Provincial taxes paid, before Federal taxes. For the sake of uniformity, and the fuller information of shareholders both classes of taxes are now disclosed in the published report. Making allowance for the resulting increase under this heading, profits are lower by \$268,448, leaving \$1,668,804 to be carried forward in Profit & Loss Account, after the usual deduction for dividends, etc."

"In keeping with the downward trend in interest rates and the resulting difficulty in employing funds profitably, the banks and most other institutions accepting deposits reduced their rates on interest-bearing accounts by 1 per cent. from November 1, 1934. This has had a beneficial effect upon bond prices, and has helped to reduce the cost of Dominion and Provincial financing."

Mr. Dobson made special reference to the satisfactory results achieved by the branches in Canada, and the valuable assistance they have given to exporters in the development of international trade in the countries where the bank is represented.

In conclusion, he said: "On the whole, 1934 may be regarded as a year of substantial recovery for Canada. While we still have many problems to solve, we

ROYAL YEAST CAKES

give you breads in tempting variety...

Try your hand at this simple recipe for delicious homemade bread—page 8 of the Royal Yeast Cake Book.

Breakfast fit for a king! Make this Coffee Cake—page 12, Royal Yeast Cake Book.

Have, I believe, every justification for looking forward with confidence to a further improvement in conditions during 1935."

The normal duty on Canadian wheat imported into the United States is 42 cents per bushel.

Tested Eczema Remedy

Is Prescription of Doctor

Your skin trouble—whether it is eczema, acne, hives, dermatitis, ringworm, or infection or pimples and blotches—will be positively benefited by D.D.D., because D.D.D. is a tried and tested Physician's Prescription. D.D.D. was developed originally for his own patients by Dr. D. D. Donahue. It is now manufactured by the makers of Camphor's Italian Balm. In 38 years D.D.D. has brought clear, beautiful skin to millions. At drugstores. Trial size 5c. Guaranteed to give actual relief or money refunded.

SEVEN CENTRAL BANK DIRECTORS ARE ELECTED

Ottawa.—Seven directors for the Bank of Canada, Canada's first central bank, were elected at a general meeting of the shareholders.

The directors, with the number of votes received in brackets, follow: Category "A", primary industry: William K. McKean, Halifax (18,934); Robert A. Wright, Drinkwater, Sask. (24,206).

Category "B", commerce: William D. Black, Hamilton (23,240); Robert J. Magor, Montreal (18,097).

Category "C", other occupations: Joseph Beaulieu, Montreal (17,300); Thomas Bradshaw, Toronto (23,385); W. C. Woodward, Vancouver.

Answering a question, Mr. Towers said the first annual meeting of the bank would not be held until February, 1936. The bank would not function until licensed by the minister of finance and this would not take place until March of this year. Consequently the provision in the pact for the annual meeting in February would not apply this year.

The slate of directors proposed by the Canadian chamber of commerce carried the day as every director elected was on the slate.

Directors attending board meetings of the bank in Ottawa will receive fees of \$150 for each meeting, in addition to travelling expenses. Agreement on this scale was reached unanimously at the general meeting of the bank shareholders while scrutineers were examining the ballots to ascertain the result of voting to select seven directors. One director will be named to sit with the executive board and his fee was fixed at \$50 per meeting.

The directors are required to meet at least four times a year and the executive board, composed of the governor, deputy governor, the 'emergency minister of finance and the executive member of the board, will meet at least once each week, minimum total fees are fixed by statute at \$20,000 per year.

Will Make Report Soon

Mass Buying Commission Attempting To Finish Its Evidence

Ottawa.—The royal commission on mass buying is attempting to finish its evidence and report to the house as soon as possible. Premier R. B. Bennett announced in the House of Commons. It would not be proper, he said, for the government to attempt to influence the commission.

Liberal leader Mackenzie King introduced the question, asking when the commission would report. It would be a good thing, if the report was ready and legislation introduced as soon as possible.

The prime minister said he agreed it would be beneficial if legislation was introduced soon, but the government did not believe it should interfere with the commission. He had been informed the commission was expediting its work.

Bandit Leader Killed

Wuhu, Anhwei Province, China.—The leader of the Communist bandits who murdered Mr. and Mrs. John C. Stam, United States missionaries, paid for the crime with his life, according to word received here from South Anhwei. The leader, the reports said, whose name was Chang Weichow, was shot within the past two weeks by National government troops who had been attempting to drive the Reds from the district.

Would Put Farm Workers On Dole London.—A unanimous report is being submitted to the cabinet recommending that 750,000 British farm workers be brought under the dole. The report is the work of a statutory committee established under the Unemployment Insurance Act of 1934 and specifically charged with the task of making proposals on insurance against unemployment of agricultural workers. Sir William Beveridge is the chairman.

Drop In Estimates

Federal Appropriations For Financial Year Are Reduced

Ottawa.—A drop of \$93,068 from last year is noted in the main estimates tabled by Finance Minister E. W. Rhodes in the House of Commons. Appropriations for the forthcoming financial year are \$361,969,944 as against \$352,091,012, representing main and supplementary appropriations for last fiscal year.

The principal increase this year is one of \$4,299,440 on public works. This is almost offset, however, by a decrease of \$4,150,476 in interest on the public debt.

Other substantial increases are \$738,000 for aviation, \$559,984 for the post office, \$329,488 for railways and canals, \$230,925 for trade and commerce and \$403,893 for agriculture.

Outside the cut in the public debt interest, the largest decreases include \$2,040,234 in miscellaneous expenditures, \$442,309 for soldiers and general land settlement, \$207,520 for legislation and \$582,493 in charges of management.

The \$700,000 increase in aviation is for the Royal Canadian Air Force, with an additional \$38,000 to be expended on civil aviation.

The militia and naval appropriations are slightly increased, the total this year being \$1,252,801 compared with \$1,108,280 for last fiscal year.

In the public works appropriations amounting to \$13,024,000, public buildings in Nova Scotia will be erected or repaired to the extent of \$129,000, while \$250,700 will be spent in that province for harbors and rivers.

Prince Edward Island receives \$6,500 for public buildings and \$67,000 for harbors and rivers. New Brunswick's portions are \$112,000 and \$391,200; Quebec, \$298,400 and \$1,744,500; Ontario, \$599,200 and \$880,500; Manitoba, \$31,500 and \$49,500. Saskatchewan's public buildings have an appropriation of \$38,000, and Alberta, \$72,500. The two last named share \$84,000 for harbors and rivers.

In British Columbia \$353,100 is being appropriated for public buildings and \$316,250 for harbors and rivers.

Industrial Technique

Publicity Campaign To Be Carried On By United Farmers Of Alberta

Calgary.—Designed to show the advance of industrial technique and the development of co-operative marketing, publicity and organization work will be carried on in a large way by the United Farmers of Alberta.

All methods of publicity and communications will be used to sponsor the spread of co-operative knowledge to Alberta's populace.

Plans for the campaign have been sanctioned by the U.F.A. executive board, which has been in session here.

J. K. Sutherland, Hanna; Geo. E. Church, Balzac; and Geo. E. Brown, Castor, have been elected board members, and J. K. Sutherland has been appointed a member of the co-operative committee.

Survey Of Buildings

Edmonton.—Survey of all buildings in the city with such civil departments as assessors, engineers, health and fire inspection taking an active part, to discover those not coming within the standard set by the construction council of Canada, was demanded in a resolution passed by the Edmonton Chamber of Commerce council for consideration.

Cut Bay Route Expenditures

Ottawa.—Capital expenditures on the Hudson Bay railway and terminals will be substantially less in the fiscal year 1935-36 than in 1934-35, according to estimates tabled in the commons. They call for an expenditure of \$302,000 compared with \$676,000 voted last year.

Would Widen Fruit Act

Winnipeg.—Proposal to widen the Dominion Fruit Act so growers marketing their own fruit and intra-provincial distributors would be regulated was adopted by the annual convention of the Canadian Fruit and Vegetable Jobbers' Association.

MAY SELL RANCH

Reports from London state that the Prince of Wales is considering the sale of his ranch in Alberta. Cost of maintenance and the increasing pressure of official duties were said to have caused him to consider the matter.

Farmers Must Keep Promise

Alberta Judge Rules On Orders For Debt Adjustment

Edmonton.—Farmer-debtors who agree with their creditors to pay on a third-crop basis or some other fraction must fulfil their promises or run the risk of being punishable for theft, and any orders given in future for debt adjustment on that basis must be obeyed at the risk of bankruptcy proceedings, it was stated by Mr. Justice A. F. Ewing at a sitting of the review board under the Farmers' Creditors' Arrangement Act.

Several cases have been before the board, it has developed, in which the debtor has been shown to have failed in whole or in part to live up to his contract in this respect, and the chairman therefore felt it necessary to warn that the "dishonest practice" must be stopped.

Maintenance of confidence in debtors' integrity is absolutely indispensable, he said, whatever their circumstances may be.

Vacant Posts Abolished

Ottawa.—The government has passed an order-in-council which abolishes all positions in the government service vacant on February 1. The action is merely a "cleaning up" of surplus posts within the service. If any of the posts abolished are needed they will probably be re-created.

KING AND QUEEN OF THE BELGIANS ON HOLIDAY

Here we see King Leopold and Queen Astrid of Belgium setting out on a skiing expedition at St. Moritz, Switzerland. The King and Queen are very proficient in the art of skiing and greatly enjoy the winter sports.

Short Senate Debate

Social Legislation A New Step In Pathway Of Canada

Ottawa.—Without a dissenting voice, the senate adopted the address in reply to the speech from the throne in one of the shortest debates in 10 years. Adjournment of the upper chamber then was made until Feb. 5.

"I believe the country as a whole expects parliament to take action, real proper and forward action, in this direction," Rt. Hon. Arthur Meighen said in commendation of the legislative program in closing the discussion.

Only three members of the upper chamber entered into the debate. Senator Raoul Dandurand, Liberal leader, followed by Hon. J. P. B. Cagrain, Montreal, and Senator Meighen.

"Never before has parliament met with a menu of that attraction, and that challenge on their desks," declared the government leader. "That care will be necessary in the framing of these measures goes without saying."

"That they will involve burdens upon those best able to pay goes without saying; but I ask hon. members who have watched the evolution of the world in the last 10 years, who have examined the social conditions of this country itself, if in their hearts, they believe these things can be avoided."

The social legislation announced in the speech was a "new step in the pathway of Canada."

Relief Appropriations

Additional Advance Of \$1,250,000 For Saskatchewan

Ottawa.—An additional advance of \$1,250,000 for relief assistance in the drought areas of Saskatchewan was provided for by an order-in-council dated Jan. 22, and tabled in the House of Commons. The advance was made on the report of the federal administrator, dated Jan. 17, that additional assistance was needed.

An order-in-council passed Jan. 22, provides an appropriation of \$75,000 for relief to permanent residents of Canadian national parks, in immediate need.

Western Canada Fairs

Officers Are Elected At Annual Meeting Held In Winnipeg

Winnipeg.—Erwin Dean, Estevan, Sask., was elected president of the Western Canada Fairs Association at its annual meeting here.

J. R. Gunne, Dauphin, Man., was elected first vice-president; H. F. Hedley, Melfort, Sask., second vice-president; S. E. Heckbert, Vermilion, Alta., third vice-president, and Keith Stewart, Portage la Prairie, Man., secretary-treasurer.

PLAN TO RESTORE HALF OF CIVIL SERVICE PAY CUTS

Ottawa.—The announcement was made in the House of Commons that a measure would be submitted which would provide for a restoration of one-half of the civil service salary deduction, from next April 1. In winding down the estimates, Minister of Finance E. W. Rhodes said:

"To facilitate the preparation of these estimates and to enable them to be presented to the house at the earliest possible moment, they have been prepared on a basis of the current year containing a provision for a salary reduction of 10 per cent. for those who receive salaries in excess of \$1,000 per year."

"As stated to the house on previous occasions, it is the desire of the government to make complete restoration at the earliest possible moment, the governing factor being the revenues available."

"In view of the present state of the revenues, the government proposes to submit a measure which will provide for a restoration of one-half of the deduction from April 1 next."

"The government is fully aware that salary deductions have in many instances caused inconvenience and in some cases perhaps hardship, and it is, therefore, most appreciative of the manner in which on the whole the position has been accepted by the civil service."

Quota Will Be Uniform

Ontario's New Policy Governing Food Allowance For Relief

Toronto.—Uniform food allowances will go into effect throughout Ontario immediately as part of a new government policy, Hon. David A. Crow, minister of public welfare, announced.

The policy is designed to eliminate claims of discrimination from any municipality.

In 90 per cent. of the municipalities, Mr. Crow said, the change means an increase in food allowances, if the municipality wishes it, and is willing to contribute proportionately. In a few places it means reductions, among them Toronto townships.

"This means," Mr. Crow said in his statement about the new policy, "that a family of four will receive food to the value of \$5.25 a week. We think that adequate, and our scheme is scientifically determined by current prices. You don't have to be any kind of expert but a housewife can realize that the figure is fair. In addition, they are permitted to earn, without deductions, up to one-third of the monthly food allowance."

Will Renew Loan

Federal Advance To Saskatchewan To Be Renewed For Year

Ottawa.—A loan of \$500,000 made by the Dominion treasury to Saskatchewan Jan. 24, 1934, maturing next Jan. 30, will be renewed for one year, the province depositing new 4½ per cent. treasury bills with the federal government and paying the interest due on those maturing, it was stated in an order-in-council passed Jan. 22, and tabled in the House of Commons.

An additional order-in-council also tabled stated the federal government would accept treasury bills for interest of \$45,968 due the Dominion on treasury bills already deposited by the province in connection with advances made.

Coal Drivers Strike

Fargo, N.D.—With the mercury around 30 below zero the coal supply of Fargo and Moorhead was threatened when upward of 300 truck-drivers walked out on strike. Police were protecting deliveries "where the need was imperative." Union recognition, seniority rights, organization of a board of arbitration and reinstatement of five truck drivers discharged allegedly for union activities are demanded by the strikers.

A Mixed Message.

A number of soldiers were practising oral messages along the line.

The leader, who was a stern man, sent along the following message:

"Send reinforcements; we are going to advance."

But the young private who was at the end of the line was astonished when he got this:

"Send three and four pence; we are going to a dance."

STONY'S SKOO SKIERS HAVE A SPORTS DAY

Sunday was a gala day for members of the Skoo Skii Club. Two sleigh loads of members and their friends drove out from town early in the afternoon, and on arriving at the Hubbel Hill the fun began. The hill is now in pretty good shape, and a long run out onto the lake is now possible. A good program of events has been arranged for the afternoon of the 3rd. A good turnout is expected, as those who have been suffering from frozen toes, chilblains and invisible bruises will probably be off the sick list by then.

Heard on Main Street.

Lady Patron: Tell me, are you sure this preparation will remove wrinkles?

Apothecary: Madam, I can assure you it will remove the wrinkles from corrugated iron.

Garnet Wheat to Be Graded Separate.

Beginning Aug. 1 the Dominion Gov't has made provision for the separate grading of Garnet wheat. The price which will be paid for this variety will probably be governed by the demand. If the demand is not closely related to the quantity produced, there may be a reduction in price which will make it unprofitable to grow this variety. Farmers who intend to grow Garnet for another year would be well advised to make preparations to have seed of some other suitable variety ready for seeding in 1936 in the event of prices for Garnet being too low for profitable production.

No. 1 and No. 2.

Crayons

From 5c up.

DON'T KNOW HOW TO SNOW IN ALBERTA

Alberta, with its occasional skiffs of snow, doesn't know anything about real snowfalls. Listen to this one, from a British Columbia paper: A train (location not given) was going along until it struck a snowdrift. A farmer carrying a long pole showed up on the scene. He would walk a few steps and then stick the pole down in the snow.

Finally the farmer got close to the train and a passenger raised a window and asked him:

"How deep do you find the snow out there?"

"I'll be darned if I know," he replied. "What I'm hunting for is my barn."

Steady Progress.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up-to-the-minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.

New Body Lines and More Room in 1935 Ford V-8

THE largest and roomiest cars Ford has ever built, with new body lines of advanced streamline design, are illustrated above in this Ford V-8 de luxe Tudor sedan for 1935. Sedans seat six passengers in comfort. Luxurious appointments are new. The eleven body types are all finished in new baked enamel which is said to need only washing to restore its high lustre. Cars are approximately eight inches longer from bumper to bumper and seats are wider. Chassis improvements, including moving the engine forward more than eight inches and new spring suspension, add to riding comfort, especially of rear seat passengers. Directed-down crankcase ventilation is an improvement of the 90 horsepower V-8 engine.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding fence a long way from the Hour-glass ranch house.

Dustin unexpectedly comes along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Crewe go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he took from it.

They go back to camp, and Dustin shoots Kane. He fears the shooting on Peyrol Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of entries in the notebook belonging to Dad Kane. Duro Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory.

(Now Go On With The Story)

CHAPTER X.—Continued

"Seven what . . . ?" he demanded. "What was he measuring by?" Stone dragged out his watch, laid it on a rock and deliberately set about rolling a cigarette.

"I may be all right," he said. "I

may be just a fool but it occurred to me . . . Well! Listen . . . I You see old Kane, bel'n a desert-rat, never carried any measurin' tape line. He probably doesn't even use a watch. Hardly any of 'em do. They tell time by the sun. Of course that distance can't be paces. It isn't miles because he has no way of estimating how far a mile is. What can it be? You guess."

But Edith shook her bright head and watched him. He grinned at her.

"I guess cigarettes," he said. "I've heard it's a common measure along and how the Border and in Mexico. It can't hurt any to try it and see. 'Seven one, would be the distance he would travel in smoking seven and one-tenth cigarettes. You take this watch and time me while I smoke this cigarette. . . I mustn't just hurry through it, you know. I've got to smoke it in the leisurely way old Kane smokes when he's hoofin' along behind his jackasses at about a mile and a half an hour."

"They do a little better than that," she laughed, "but you may be right. It can't hurt any to try. Give me the watch."

He sat on a rock at her feet and in between puffs at that cigarette he studied her profile as she kept her eyes on the watch.

"Seven minutes and a half," she said finally. And neither of them knew that in those seven minutes Fate had dealt a new hand to them both.

"That's good. That makes about forty-five minutes up Red Water canon to a white birch. White birches ought not to be very plentiful in this land. Let's go. We'll lead the ponies. It's too rough to ride."

For nearly an hour they blundered their way heavily up the canon and finally paused at a stunted white birch. Stone let out a whoop of delight.

"All right so far," he said. "Now let's try again. I'll roll three this time and keep check on you. The trail is rougher here." And with Edith talking along at his side he headed up the valley.

"Sunk can," he said breathlessly. "I wonder why he wrote 'sunk can'?"

"Where'd you get that word 'cache'?" she countered swiftly.

"Look here, Mr. Duro Stone . . . Mr. Hard Stone . . . You come clean with me. You can pull the mane over Frank Crewe's eyes but

come clean with me. You're no amateur cow-puncher as you'd like us to think."

He studied her with glowing eyes. It was not at all unpleasant to shed that false identity with her. Yet he could not tell her quite yet. Too, he knew that when she knew exactly who he was, she would be furiously angry. He considered that ruefully.

"Well . . . He hesitated a little. "You're early right, Miss . . . Edith . . . He separated title and name so that he was calling her "Edith."

"I'm not exactly the amateur I posed for. Gerald Keene is my best friend. He learned at Calo from Mr. Burwell at the bank there that there was trouble down here with Dustin. He figured out that if he came down here he might not be able to find out exactly how things stand so we decided it would be best for me to come down and find out exactly what the trouble is and . . ."

"You mean . . . The red head flung high in wrath. . . You mean that you came as a spy in the camp to find out if the Hour-glass is honest . . . ?"

"Do I mean that? You listen to me, Edith Carr, and stop bel'n a fool. I'm a western-bred man and I know my business. I know that a man does not tie to a man without reason. I know that when Peter Vin-

ton took your father as his partner, old Joe Carr was a man worth tyin' to. . . Her eyes lit at that with a different light and she even smiled a little.

"If Keene had come down here and all the world knew him as Gerald Keene how far would he have gone in getting proof of the crooked work of this man Dustin?"

"You mean that you represent Mr. Keene?"

"Exactly. But remember that no one else knows it. The whole thing will be clear on the tenth . . . when Keene unmaskes. . ."

She studied him for a long minute. She noted the lean lines of the

jaw; the quiet smoky-grey eyes shot with hazel sparks. She noted the firm lips and the aggressive chin. Then she took in the rippling muscles from wrist to shoulder, the "hour-glass" torso. She studied him but she said never a word. She merely nodded but that nod was one of complete and utter satisfaction.

There was something about this man Duro Stone that gave her a sense of great relief. The third cigarette was all ash when he stopped and pointed to a pile of freshly turned earth.

"That'll be the sunk can," he said tersely.

She ran forward with a little cry and joined him as he stood over the place. The fresh earth had been heaped in a little pile that he promptly scratched away with both hands and feet disclosing an ordinary five-gallon can that was filled with charcoal. Edith looked at it uncomprehendingly but Stone gave a little grunt of surprise.

"Old Kane knows more than I gave him credit for," he said. "Did you ever read any surveying, Edith? No? I thought not. . . Well, I'll tell you something. . . Out in the West where trees are by no means plentiful, surveyors have to use the most permanent means they can to mark the claims they desire. Back East trees are used. Out here they have to use what they can get. They have found that charcoal buried in the place they want to mark, is the most permanent means. This can of charcoal marks a corner of the claim that old Kane had selected. He's run his lines from this can so as to include all the land he thinks has got one on it. That's what he's after, of course."

"I should have thought he would have described the claim in his notebook," she said.

"No. . . That's where he's wise. Don't you see? He's a partner of this man Dustin's and he doesn't trust Dustin. That's it. Do you happen to know whether this is Hour-glass land?"

"I am sure it is," she said. "Our lines run along that far crest. . . What's the matter?" she asked sharply. "What are you looking at?"

For Duro Stone, who had studied his craft from the catalogs of big department stores, was standing at gaze and his eyes were focused on a raw cut in the hillside not a hundred feet away from them.

He did not pause for explanations. He moved at that cut and disappeared in it and was back presently with both hands filled with great chunks of ore.

(To Be Continued)

Little Helps For This Week

"Finally, my brethren, be strong in the Lord and in the power of His Might," Ephesians 6:10.

"No man can serve two masters," Matthew 6:24.

Oh, there are heavenly heights to reach

In many a fearful place,
Where the poor timid heir of God
Lies blind on his face;
Lies languishing for grace divine
That he shall never see.

Till he go forward at the sign,
And trust himself to Thee.

—A. L. Waring.

Reservations lie latent in the mind concerning some habits in the present, some possibly impending temptations in the future, and thus do we cheat ourselves of inward and outward joys together. We give up many an indulgence for sometimes sake, but stop short at the point of entire faithfulness wherein conscience could reward us. If we would but give ourselves wholly to God, give up for the present and the future every act, and above all, every thought and every feeling, to be all purified to the utmost, then would we receive bear with it a peace rendering itself truly believe far easier than before.

F. B. Cobb.

Different In Old Days
To-day proceedings of Brantford, Ontario, city council are sober and dignified but in the old times may have been different. Anyhow this village council that year passed a resolution "that any member coming to council drunk and acting like a fool shall not be listened to."

TRY FASTER WAY
TO RELIEVE A COLD

Discovery Bringing
Almost Instant Relief to Millions

Follow Simple Directions:

When you have a cold, remember the simple treatment pictured here. It is prescribed by doctors as the quick, safe way.

Results are amazing. Ache and distress go immediately. Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly. Your cold is relieved "quick as you caught it!"

All you do is take Aspirin and drink plenty of water. Do this every 2 to 4 hours the first day—less often afterward . . . If throat is sore, the Aspirin gangle will ease it in as little as 2 minutes.

Ask your doctor about this. And be sure you get ASPIRIN when you buy. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM
THE HEART

Planets Without Life

Decision Arrived At By Professor At Toronto University

Proponents of inter-planetary communication received a setback by the declaration of Prof. Lachlan Gilchrist, professor of geophysics at the University of Toronto and president of the Royal Astronomical Society of Canada, life does not exist on neighboring planets.

Presenting the annual presidential address at the society's conversations at the university, Prof. Gilchrist said investigations of the atmosphere of the planets, made in the United States and elsewhere during the past few months, definitely preclude any possibility of life there.

May Spring Surprise

But one of these days the railways may start to run buses and trucks on the rails, as these now run on the highways. Then they will come back in a way that will surprise those who are now holding post-mortems on them and wondering what to do with the remains, says the Edmonton Bulletin.

More Taxes

New Ways Of Increasing Revenue Considered By Quebec Government

New forms of taxation being considered by the Quebec government were outlined by Premier L. A. Taschereau in the legislative assembly as follows:

A tax on soft drinks.

A tax of between five and 10 per cent. on large incomes.

A tax on certain commercial operations.

A sales tax.

An increase in the gasoline tax from six to seven cents per gallon, provided Ontario would agree to make a similar increase.

The veteran premier spoke at length following opening of the debate on the address in reply to the speech from the throne by Maurice Duplessis, K.C., leader of the opposition.

Pneumatic tires were invented in 1889 by an Irish physician who wanted to make a long bicycle ride to school more comfortable for his young son.

Do you
waste Food?

Of course you don't waste food intentionally. But how much do you waste without knowing it?

How often have you thrown out part of a loaf—or the remnants of a cabbage or even the dried out carcass of a chicken?

These and other kitchen foods can be used to make tasty dishes if you keep them fresh—and you can keep all foods fresh by wrapping them in Para-Sani Heavy Waxed Paper.

Para-Sani has dozens of kitchen uses—wrapping baking tins, wrapping sandwiches, preserving the crispness of lettuce and celery. You'll find the self-cutting Para-Sani green box, a great convenience and a real economy.

SENIOR HOCKEYISTS WIN FROM CONCORDIAS

At the hockey game here on Sunday afternoon Concordia College pucksters crossed sticks with Stony's Seniors, with the result that the local boys won by the score of 3 goals to 2, after giving a good exhibition of hockey playing. Louie Enders was in goal for Stonies, and he sure stopped lots of 'em. Clarence Lory refereed in his usual meticulous manner, and there was a good turnout of spectators. A return game is planned, for the local boys to play in the City.

UFA Want the APP Back.

A non-renewal of the present agreement with the Dominion government, under which Alberta is policed by the RCMP, and reinstatement of the Alberta Provincial Police, is asked for in a resolution adopted by the annual convention of the UFA delegates at Calgary. The agreement, made in 1932, expires this year.

The resolution on the subject was first passed without discussion, but in view of its importance the question was reopened, and, after some discussion, carried a second time. Several complaints as to the manner in which the RCMP carries out its duties in various parts of the province, were made by delegates.

Brightbank News.

Hunting jackrabbits by moonlight around green feed and hay stacks is the latest sport in Brightbank and Hansen's Corners district.

The literary entertainment held at Hansen's Corners Jan. 12 was a huge success.

A birthday surprise party was given Miss G. Weberling on the night of Jan. 16. Quite a large crowd gathered.

Many frosts have been reported during the recent severe weather.

Mr. Bauer and a companion got quite badly frost bitten when out on a recent trip, and their driving horse got soaced, took such a sudden jump that the outer got disconnected and the horse ran away. It took about an hour to catch him.

A surprise party visited Mr. and Mrs. Harry Clausen the night of Jan. 17. Games, singing and dancing were indulged in, and a splendid time was enjoyed by all present. Willie Kyle was the principal entertainer, with his Harry Lauder costume and songs.

What a Man?

The manager of a touring theatrical company wired to the proprietor of a theater in a small town where his company was due to appear.

"Would like to hold rehearsal next Monday afternoon at 3. Have your stage manager, carpenter, property man, electrician, and all the stage hands present at that hour."

"Four hours later he received the following reply: "All right; he'll be there."

Card of Thanks.

Mrs. E. Leeder and Family of Stony Plain wish to thank their many friends and neighbors for their kindness and sympathy shown them during their recent illness and convalescence, also for the beautiful floral tributes.

C.G.I.T. TO CELEBRATE ITS 21ST ANNIVERSARY

The Canadian Girls in Training held their meeting Monday evening at the home of Mrs. Gates, who gave a most interesting talk on "Missionary Work." Those present were:
